

SPACE BADGE

Complete three activities, you could:

- 1. Explore first-hand accounts from people who have been involved in the space industry or witnessed its impact.**

You could speak with someone working in the field or try and talk to someone who watched the moon landing on television.

- 2. Grow a plant without using soil.**

Find out how things are grown in space and why we might need to.

- 3. Find out about light pollution and how this can affect our exploration of space.**

Find out about a campaign near you and do something to help them.

- 4. Find out about satellites and space rovers, you could practice controlling something from a distance and learn why this is useful.**

- 5. Using a medium of your choice showcase something about space that interests you.**

You may want to take photos, record a video, compose music or complete a piece of artwork.
