

EXPERIMENT BADGE

A chance to take something to bits, which I'm sure you've done before!

For the experiment badge you need to complete the following:

1. Decide an experiment to carry out and try and work out what might happen
2. Investigate something of interest to find out how it works; or grow something from seed
3. Tell others in your Colony what you saw and discovered

Some examples of experiments could include:

- Growing a bulb
- Growing mustard and cress, a seed potato, bean or carrot top
- Showing how a torch works from the bits that make it up
- Showing what a magnet can do, or making a game using magnets

Notes

A Beaver Scout who has qualified for the British Science Association's CREST Star Investigators Star Award automatically qualifies for this badge.
